BDS Beaverstate Dental Systems

NEW PRODUCT RELEASE

Introducing the Water Bottle Quick Disconnect

A simple, innovative replacement for the traditional pressure-head assembly that makes bottle removal, depressurization, and refilling easier and more controlled.

Part No.
110-003

A Faster, Safer Way to Refill Your Dental Unit Water Bottle

Automatic Air Shutoff
Air supply automatically shuts off when the bottle and adapter are removed.

Controlled Depressurization
A partial turn allows pressure to vent before bottle removal.

Quick Bottle Removal
Continue turning to fully release the bottle and adapter.

Treatment-Friendly Design
No internal interference for water treatment straws

Built to Last
Engineered for durability in demanding environments.

Compatibility
Works w/ most bottle systems using a 1" mounting pattern.

Less Downtime
Minimize interruptions and keep systems running.
